Subject: Coming to closure on the Galloway et al/PFAS GenX Parkersburg manuscript

Colleagues – as you know ORD is finalizing a manuscript documenting research in the Ohio River valley on PFAS deposition. Several of you have commented on the draft manuscript, and the lead EPA author (Andy Lindstrom) has made revisions which he believes addresses your comments to the best of his ability.

Attached to this email is the revised manuscript with revisions in track changes, plus some comments from me asking you if you agree your concerns have been addressed, or if you have other suggestions. Please review this and send me any final suggestions. **At this stage, rather than general comments, it would be most helpful for you to propose edits or revisions to the text, using track changes,** to address any remaining concerns.

I intend to make a final decision on this manuscript by October 18, so input received from you before then will be most helpful. I will carefully consider your comments as I work with the author to finalize the manuscript for submission.

I also attach a compilation of your concerns which we received some months ago, which I asked Andy to consider as he made his revisions.

Thanks, best regards, Andy

Andrew J. R. Gillespie, Ph. D.
